INSTALLATION AND OPERATING INSTRUCTIONS

DESIGNED SMART. BUILT SOLID.®

Fabrication Equipment:
- Overhead Warmers, Hot & Cold Food Wells & Accessories, Drawer Accessories, Sinks
Overhead Warming Equipment:
- Overhead Warmers, Illuminated Light Boxes
Hot Food Wells:
- Bottom Mount Wells, Round Soup Wells, 4/3 Hot Food Wells, Fractional Insulated Top Mounts, Multiple Hot Food Wells, Economy Bottom Mount Wells, Top Mount Wells, Insulated Top Mount, Insulated Cold Pans, Accessories
Hot Plates
Drawer Assemblies:
- Holding Drawers, Heavy Duty Drawer Assemblies, Drawer Assemblies, Drawer Pans, Fronts & Accessories
Sinks:
- Scullery Sinks, Strainer Pan & Bar Sinks

INTENDED FOR OTHER THAN HOUSEHOLD USE

WARNING: California Residents Only. This product can expose you to chemicals including chromium which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
GENERAL INFORMATION

General Installation
1. Always clean equipment thoroughly before first use. (See general cleaning instructions.)
2. Check rating label for your model designation & electrical rating.
3. For best results, use stainless steel countertops.
4. All dimensions in parenthesis in centimeters unless noted.

General Operation Instructions
1. All foodservice equipment should be operated by trained personnel.
2. Do not allow your customers to come in contact with any surface labeled “CAUTION HOT”.
3. Where applicable: Never pour cold water into dry heated units.
4. Where applicable, do not cook, warm or hold food directly in liner pans (well pans). Always use steamtable pans/insets, etc.
5. Never hold food below 150°F (66°C).
Wet set-up and operation procedures (Units with drains)

1. Add hot water 120°-140°F (50°- 60°C) to well pan:
   - Four Thirds Size units (12 x 27) use 5-1/2 qts. (1-1/3 gallon) (5-1/2 litre)
   - Full Size units (12 x 20) use 3.75 qts. (15 cups) (3.51 litre)
   - Two Thirds Size units use 2-1/2 qts. (10 cups) (2.5 litre)
   - Half Size units use 1-1/2 qts. (6 cups) (1.5 litre)
   - One Third Size, use 3 cups (0.7 litre)
   - 4 Quart Round use 2 cups (1/2 litre)
   - 7 Quart Round use 3 cups (0.7 litre)
   - 11 Quart Round use 1-1/4 qts. (5 cups) (1.4 litre)

2. Turn thermostat control to “10” setting or if equipped with infinite controls to “7” or “HI”. Preheat for approximately 30 minutes.

3. Place covered inset with preheated product into well.

4. Readjust control after another 30 minutes of operation to the “6” setting depending on the amount and/or thickness of product.

5. Keep inset/steamtable pan(s) covered to maintain ideal serving temperature.

6. Do not let well run dry.

Dry set-up and operation procedures (Units without drains)

1. Turn thermostat control to “10” setting or if equipped with infinite controls to “7” or “HI”. Preheat for approximately 30 minutes.

2. Place covered inset with preheated product into well.

3. Readjust control after another 30 minutes of operation to maintain desired temperature.

4. Keep inset/steamtable pan(s) covered to maintain ideal serving temperature.

General Cleaning Instructions

1. NEVER clean any electrical unit by immersing it in water. Turn off before surface cleaning.

2. Always clean equipment thoroughly before first use. Clean unit daily. Except where noted on charts: Use warm, soapy water. Mild Cleansers & PLASTIC scouring pads may be used to remove baked-on food & water scale.

3. Turn off electrical units before cleaning or servicing. All service should be preformed by an APW Wyott® authorized service agency.

GENERAL TROUBLESHOOTING

Always Ask & Check:

1. Is the unit connected to a live power source?

2. Check the circuit breaker.

3. Is power switch on & pilot light glowing?

4. Check rating label. Are you operating unit on proper voltage?

If the above checks out, and you still have problems, call an APW Wyott® authorized service agency.
OVERHEAD WARMERS ALL MODELS: FD

Installation Instructions
1. Follow General Installation Instructions on page 2. Provide a safe working clearance around unit.
2. Flush mounting brackets provided on each end of foodwarmer for chain or shelf mounting. Use four #10 screws or studs with locknuts for shelf mounting. Use #14 jack chain and “S” hooks for chain mounting. NOTE: Brackets are turned Inward for shipping purposes. Remove screws and reverse brackets.
3. Optional stainless steel remote rocker or infinite switch box kits. Installation of the remote box by service personnel requires 1/2” conduit, 1/4” push-on terminals, and no. 14 AWG copper wire suitable for at least 90°C. Mount box to a flat surface with two #10 screws or studs with locknuts.
4. Optional tubular stands: permanently mount foodwarmers to countertop. Optional portable legs and cord sets are also available. Remove flush mounting brackets and attach stands or legs with the screws provided. Installation of the 6ft cord sets by service personnel should utilize the strain relief, grounding stud, and porcelain wire nuts provided.

Note
To avoid burning or charring of materials in the surface below the foodwarmer use only above an all-metal structure such as a table or counter top. Minimum clearance 13”. For other materials, install not closer than 16 inches above the surface.
Remote switches are recommended for under shelf mounting. Longer switch life will result from cooler switch mounting locations (see options).
Operations
1. Follow General Operating Instructions on page 2.
2. Switch on unit. Place precooked product under heat source. Use standard full-size or fractional steamable pans & perforated pan bottoms. Maximum heat coverage equivalent to length of unit.

Cleaning
1. Follow General Cleaning instructions on page 3.
MODELS BM80 BOTTOM MOUNT HOT FOOD WELLS

Installation
1. Follow General Installation instructions on page 2.
2. Install in an all stainless-steel counter top
3. Turn down edges of counter top into well pan. Use 1” (2.5) radiused corners.
4. Apply 1/4” (.6) bead of silicone sealant to top flange of unit and position warmer underneath counter.
5. Secure unit to counter with stainless steel fasteners.
6. Mount control as indicated and check nameplate for proper voltage, connect power.

Operation
1. Follow General Operating Instructions on page 2.

Cleaning
1. Follow General Cleaning Instructions on page 2.

All models are UR. The UL Models include flexible conduit, electrical box & recessed bezel and are designed with a “UL” suffix on the Model & Stock No.s.

MODELS BM30 BOTTOM MOUNT HOT FOOD WELLS

Installation
1. Follow General Installation Instructions on page 2.
2. Install in an all stainless-steel counter top.
3. Turndown edges of counter top into well pan. Use 1" (2.5) radiused corners.
4. Apply 1/4" (.6) bead of silicone sealant to top flange of unit and position warmer underneath counter.
5. Secure unit to counter with stainless steel fasteners.
6. Mount control as indicated and check nameplate for proper voltage, connect power.

Operation
Follow General Operating Instructions on page 2.

Cleaning
Follow General Cleaning Instructions on page 2.

All models are UR. The UL Models include flexible conduit, electrical box & recessed bezel and are designed with a “UL” suffix on the Model & Stock No.s.
MODELS SM50 SOUP WELLS TOP MOUNT W/EZ LOCK

Installation
1. Follow General Installation Instructions on page 2.
2. Make applicable Cut-Out per below table. Note: Unit is designed for installation in stainless steel tops. Optional wood mounting kit available.
3. Apply putty tape to underside perimeter of the well rim outer edge.
4. Apply a 1/4” (.6) bead or silicone sealant adjacent to the putty tape on the well flange.
5. Drop well into opening from the top and push down until entire perimeter of rim is flush with the counter surface.
6. From below the counter surface insert an 8” to 10” (20 to 25 cm) flat tip screwdriver into the locking ring tab slots and twist in a clockwise motion to lock well in place.
7. Trim excess putty and sealant from around well rim.
8. Mount control to front panel using hardware. Maintain 4” (10.2) clearance between well and front panel.
9. Check nameplate for proper voltage, connect power.

Note: Electrically connect units to comply with local and NEC codes.

Operation
Follow General Operating Instructions on page 2.

Cleaning

Description: Lever Operated Drain Valve
Stock No.: 56360
Drain Manifold: Fabricated to Unit, Specify

NOTE: Cut-Out sizes are different from standard APW WYOTT HFW's.
Installation
1. Follow General Installation Instructions on page 2.
2. These models are designed to be installed in a stainless steel or wood counter.
3. Make applicable cut out in counter top per the below table.
4. Apply putty tape (provided) to underside perimeter or the well rim outer edge.
5. Apply a 1/4” (.6) bead of silicone sealant adjacent to the putty tape on the well flange.
6. Drop well into opening from the top and push down until entire perimeter of rim is flush with the counter surface.
7. From below the counter surface insert an 8” to 10” (20 to 25 em) flat tip screw driver into the locking ring tab slots and twist in a clockwise motion to lock well in place.
8. Trim excess putty and sealant from around well rim.
9. Mount control to front panel using hardware. Maintain 4” (10.2) clearance between well and front panel. Check nameplate for proper voltage, connect power. Note: Electrically connect unit in compliance with any local and NEC codes.
10. Connect overflow tube on hot food well to suitable tubing to handle 212°F water run to open drain. Note: Electrically connect units to comply with local and NES codes.

Operation
Follow General Operating Instructions on page 2.

Cleaning
Follow General Cleaning Instructions on page 2.
APW WYOTT® EZFILL SLIM LINE HOT FOOD WELLS

Installation
1. Follow General Installation Instructions on page 2.
2. These models are designed to be installed in a stainless steel. Optional wood mounting kit available.
3. Make applicable cut out in counter top per the below table.
4. Apply putty tape (provided) to underside perimeter or the well rim outer edge.
5. Apply a 1/4" (.6) bead of silicone sealant adjacent to the putty tape on the well flange.
6. Drop well into opening from the top and push down until entire perimeter or rim is flush with the counter surface.
7. From below the counter surface insert an 8" to 10" (20 to 25 cm) flat tip screwdriver into the locking ring tab slots and twist in a clockwise motion to lock well in place.
8. Trim excess putty and sealant from around well rim.
9. Mount control to front panel using hardware. Maintain 4" (10.2) clearance between well and front panel. Check nameplate for proper voltage, connect power.
10. Connect overflow tube on hot food well to suitable tubing to handle 212°F water run to open drain.
Note: Electrically connect units to comply with local and NEC codes.

Operation
Follow General Operating Instructions on page 2.

Cleaning
Follow General Cleaning Instructions on page 2.
MODELS TM12L-TOP MOUNT HOT FOOD WELLS W/EZ LOCK

Installation
1. Follow General Installation Instructions on page 2.
2. Make applicable Cut-Out per below table. Note: Unite is designed for installation in stainless steel tops.
   Optional wood mounting kit available.
3. Apply putty tape to the underside perimeter of the well rim outer edge.
4. Apply a 1/4” (.6) bead of silicone sealant adjacent to the putty tape on the well flange.
5. Drop well into opening from the top and push down until entire perimeter of rim is flush with the counter surface.
6. From below the counter surface insert an 8” to 10” (20 to 25 cm) flat tip screwdriver. into the locking ring tab slots and twist in a clockwise motion to lock well in place.
7. Trim excess putty and sealant from around well rim.
8. Mount control to front panel using hardware. Maintain 4” (10.2) clearance between well and front panel.
9. Check nameplate for proper voltage, connect power.
   Note: Electrically connect units to comply with local and NES codes.

Operation
Follow General Operating Instructions on page 2.

Cleaning
Follow General Cleaning Instructions on page 2.
All models are UR. The UL Models include flexible conduit, electrical box & recessed bezel and are designed with a “UL” suffix on the Model & Stock No.s.
Built-In Holding Drawers “HDD-_B”

Installation

1. Mark cut-out front of counter and fabricate hole.
2. Fabricate support rails and rear brace, NOTE: Weight of unit and load must be supported by rails and brace.
   - H01B, 118 lb (53.5 Kg.) Minimum
   - H02B, 213 lb (96.6 Kg.) Minimum
   - H03B, 309 lb (148.2 Kg.) Minimum
3. Remove drawers from unit. Apply RTV to inside of mounting frame.
4. Slide unit into opening and drill mounting holes using a 7/64 (.3cm) drill bit. NOTE: If installing unit into an opening that does not allow access to top of unit wiring must be complete before sliding unit into cabinet.
5. Secure unit to counter front using #8 (4mm) screws provided. Wipe excess RTV around front mounting frame.
6. Remove top panel. For wiring connections unit is provided with a .875” (2.2 cm) Dia. Knock-out and field wiring terminal block with .250 (.64 em) quick disconnect terminals. Unit is to be electrically installed by a qualified electrician in accordance with NEC and any local installation codes. Wire with minimum #14 GA. (1mm² suitable for at least 90°C (190°F).
7. Replace drawer assemblies.

Operation

1. Follow General Operating instructions on page 2.
2. Set thermostat control knob to desired setting and preheat each drawer for 30 minutes.
3. Place food product directly into drawer pans or use any combination of full or fractional pans up to 6” (15.2 cm) deep.
4. Set front drawer vent knob to desired position to maintain food product moisture.
5. Perforated pans may be used with a damp towel or small amount of water in the drawer pan to prevent food “dry out”. CAUTION: Use no more than 1 quart (1 litre) water.
6. If too much moisture accumulates around drawer front or vent, reduce temperature or move vent knob to “DRY” position.
7. Recommended settings:

<table>
<thead>
<tr>
<th>Product</th>
<th>Temperature (°F/°C)</th>
<th>Vent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rolls, bread</td>
<td>160-180° (71-82°)</td>
<td>Moist</td>
</tr>
<tr>
<td>Vegetables</td>
<td>170-180° (77-82°)</td>
<td>Moist</td>
</tr>
<tr>
<td>Meats</td>
<td>170-180° (77-82°)</td>
<td>Moist</td>
</tr>
</tbody>
</table>

NOTE: Temperature and vent settings will require adjustment according to type and quantity of food and the number of times the drawer is opened during operation.

Daily Cleaning

1. Follow General Cleaning instructions on page 2.
2. Remove any inset pans & drawer pans. Wash U10roughly in the sink or dishwasher.
3. Remove drawers: Remove pans and pan inserts. Extend drawer and lift up on the front to clear the drawer stop. Lower drawer and pull straight out.
HOLDING DRAWERS “HDS”

Installation
1. Mark cut-out front of counter and fabricate hole.
2. Fabricate support rails and rear brace, NOTE: Weight of unit and load must be supported by rails and brace.
   a. H0DS1B, 118 lb. (52.6 Kg) Minimum
   b. HDS2B, 213 lb. (96.2 Kg) Minimum
   c. HDS3B, 309 lb. (139.7 Kg) Minimum
3. Remove drawers from unit. Apply RTV to inside of mounting frame.
4. Slide unit into opening and drill mounting holes using a 7/64” (.3cm) drill bit. NOTE: If installing unit into an opening that does not allow access to top of unit wiring must be complete before sliding unit into cabinet.
5. Secure unit to counter front using #8 (4mm) screws provided. Wipe excess RTV around front mounting frame.
6. Remove top panel. For wiring connections unit is provided with a .875 (2.2 cm) Dia. Knock-out and field wiring terminal block with .250” (.64 cm) quick disconnect terminals. Unit is to be electrically installed by a qualified electrician in accordance with NEC and any local installation codes. Wire with minimum #14 GA. (1mm²) suitable for at least 90°C (190°F).
7. Replace drawer assemblies.

Operation
1. Follow General Operating instructions on page 2.
2. Set thermostat control knob to desired setting and preheat each drawer for 30 minutes.
3. Place food product directly into drawer pans or use any combination of full or fractional pans up to 6” (15.2 cm) deep.
4. Set front drawer vent knob to desired position to maintain food product moisture.
5. Perforated pans may be used with a damp towel or small amount of water in the drawer pan to prevent food “dry out”. CAUTION: Use no more than 1 quart (1 litre) water.
6. If too much moisture accumulates around drawer front or vent, reduce temperature or move vent knob to “DRY” position.
7. Recommended settings:
   Product  Temperature  Vent
   Rolls, bread  160-180° (71-82°C) Moist
   Vegetables  170-180° (77-82°C) Moist
   Meats  170-180° (77-82°C) Moist

NOTE: Temperature and vent settings will require adjustment according to type and quantity of food and the number of times the drawer is opened during operation.

Daily Cleaning
1. Follow General Cleaning instructions on page 2.
2. Remove any inset pans & drawer pans. Wash thoroughly in the sink or dishwasher.
3. Remove drawers: Remove pans and pan inserts. Extend drawer and lift up on the front to clear the drawer stop. Lower drawer and pull straight out.

**DRAWER ASSEMBLIES ALL MODELS 415 420 PLUS (Liner Pans: 412, 418, 422, 488)**

**Installation**
1. Remove Internal housing (the section w/drawer front) for easier handling.
2. Transfer Mounting hole configuration in external housing flange to underside of counter or braces.
3. Fasten securely with weld studs or sheet metal screws.
4. Replace internal housing by engaging drawer slides.
5. Stainless steel liner pans are recommended for direct food contact.

**Cleaning**
1. Remove liner pan for sink or dishwasher cleaning.
2. Always clean equipment thoroughly before first use. Surface clean unit daily. Use warm soapy water. Mild cleansers and plastic scouring pads may be used to remove any food or water scale.
3. Any service should be performed by an authorized APW Wyott® Service Agent.

All models are UR. The UL Models include flexible conduit, electrical box & recessed bezel and are designed with a “UL” suffix on the Model & Stock Nos.

### Drain Hole for all Standard Sinks

---

1” Spacing between sinks on multiple sinks. Sinks are all 10” deep.
APW Wyott® EQUIPMENT LIMITED WARRANTY

APW Wyott Foodservice Equipment Company warrants its equipment against defects in materials and workmanship, subject to the following conditions:

This warranty applies to the original owner only and is not assignable.

Should any product fail to function in its intended manner under normal use within the limits defined in this warranty, at the option of APW Wyott such product will be repaired or replaced by APW Wyott or its Authorized Service Agency. APW Wyott will only be responsible for charges incurred or service performed by its Authorized Service Agencies. The use of other than APW Wyott Authorized Service Agencies will void this warranty and APW Wyott will not be responsible for such work or any charges associated with same. The closest APW Wyott Authorized Service Agent must be used.

This warranty covers products shipped into the 48 contiguous United States, Hawaii, metropolitan areas of Alaska and Canada. There will be no labor coverage for equipment located on any island not connected by roadway to the mainland.

Warranty coverage on products used outside the 48 contiguous United States, Hawaii, and metropolitan areas of Alaska and Canada may vary. Contact the international APW Wyott distributor, dealer, or service agency for details.

Time Period

One year for parts and one year for labor, effective from the date of purchase by the original owner. The Authorized Service Agency may, at their option, require proof of purchase. Parts replaced under this warranty are warranted for the un-expired portion of the original product warranty only.

Exceptions

* Gas/Electric Cookline: Models GCB, GCRB, GF, GGM, GGT, CHP-H, EF, EG, EHP. Three (3) Year Warranty on all component parts, except switches and thermostats. (2 additional years on parts only. No labor on second or third year.)
* Heat Strips: Models FD, FDL, FDD, FDDL. Two (2) Year Warranty on element only. No labor second year.

In all cases, parts covered by extended warranty will be shipped FOB the factory after the first year.

Portable Carry In Products

Equipment weighing over 70 pounds or permanently installed will be serviced on-site as per the terms of this warranty. Equipment weighing 70 pounds or under, and which is not permanently installed, i.e. with cord and plug, is considered portable and is subject to the following warranty handling limitations. If portable equipment fails to operate in its intended manner on the first day of connection, or use, at APW Wyott’s option or its Authorized Service Agency, it will be serviced on site or replaced.

From day two through the conclusion of this warranty period, portable units must be taken to or sent prepaid to the APW Wyott Authorized Service Agency for in-warranty repairs. No mileage or travel charges are allowed on portable units after the first day of use. If the customer wants on-site service, they may receive same by paying the travel and mileage charges. Exceptions to this rule: (1) countertop warmers and cookers, which are covered under the Enhanced Warranty Program, and (2) toasters or rollergrills which have in store service.

Exclusions

The following conditions are not covered by warranty:

* Equipment failure relating to improper installation, improper utility connection or supply and problems due to ventilation.
* Equipment that has not been properly maintained, calibration of controls, adjustments, damage from improper cleaning and water damage to controls.
* Equipment that has not been used in an appropriate manner, or has been subject to misuse or misapplication, neglect, abuse, accident, alteration, negligence, damage during transit, delivery or installation, fire, flood, riot or act of god.
* Equipment that has the model number or serial number removed or altered.

If the equipment has been changed, altered, modified or repaired by other than an Authorized Service Agency during or after the warranty period, then the manufacturer shall not be liable for any damages to any person or to any property, which may result from the use of the equipment thereafter.

This warranty does not cover services performed at overtime or premium labor rates. Should service be required at times which normally involve overtime or premium labor rates, the owner shall be charged for the difference between normal service rates and such premium rates. APW Wyott does not assume any liability for extended delays in replacing or repairing any items beyond its control.

In all cases, the use of other than APW Wyott Authorized OEM Replacement Parts will void this warranty.

This equipment is intended for commercial use only. Warranty is void if equipment is installed in other than commercial application.

Water Quality Requirements

Water supply intended for a unit that has in excess of 3.0 grains of hardness per gallon (GPG) must be treated or softened before being used. Water containing over 3.0 GPG will decrease the efficiency and reduce the operation life of the unit.

Note: Product failure caused by liming or sediment buildup is not covered under warranty.

“The foregoing Warranty is in lieu of any and all other warranties expressed or implied including any implied warranty of merchantability or fitness for particular purposes and constitutes the entire liability of APW Wyott. In no event does the limited warranty extend beyond the terms stated herein.”
