SAVES

SAVES

SAVES

Saves energy by as much as 75% over normal run toasting mode, and at least 36% over closest competitive products.

Saves time with available “Toast Now Technology,” which eliminates warm-up wait times and energy-wasting “standby” cycles.

Saves money with rugged design features, such as stainless steel construction, heavy duty motor, drive chain and controls.

Radiant Conveyor Toaster

ECO-4000

Combines Great Toast and Energy Saving with immediate “no wait” toasting available in electronic model, and toast cycle being monitored to give consistent toast whether a single piece or 100 pieces are processed

Preset programmable buttons can be set for store menu, including long run cycles for meal times, and specialty products such as waffles or pastries

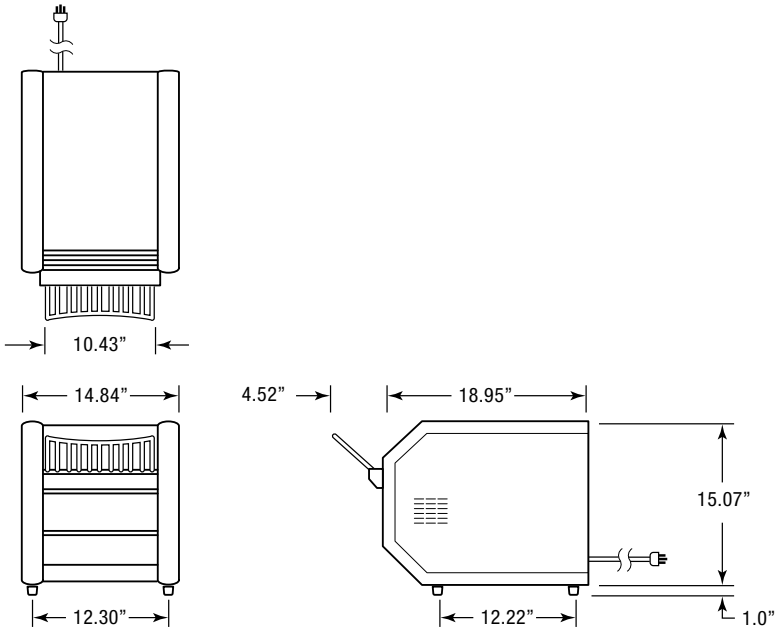

Simple controls and heavy duty construction allows for front and back of store use

Conveyor Configuration allows for thick products to be cooked and discharged. No more stuck bagels and English muffins

Energy saving mode in the programmed time cycle allows the unit (either Electronic or Analog) to automatically go into idle mode following a busy time

Dimensions

Specifications

Construction

Stainless steel housing and rails on front and sides, aluminized steel on the back panels and inside surfaces. Stainless Steel crumb and toast trays. Metal sheathed heating elements in the analog (L) models and quartz tube heating elements in the Electronic (E) models. Stainless steel wire conveyor belt. High temperature insulation protects control panel and exteriors.
